

Business-Class on a Coach Budget

Our premiere line of services include personal, on-site visits to ensure your servers, workstations, and network devices are operating at their optimal performance.

Perhaps your business is thriving; or maybe just getting off the ground. Either way, PRS Tek Services offers you the benefits of having a regular in-house technical consultant at your disposal without the overhead costs of salary, training, and liability.

Our fee schedule allows maximum flexibility to cater to any budget. Use as little, or as many services as you wish to meet your needs.

We Leave the Geeks Behind

Our service plans start at only \$85 per month and include:

- Regularly scheduled on-site visits
- Telephone and Remote Access support
- Unlimited email support
- All servers, workstations, and network devices checked for firmware and software updates
- Backup processes maintained
- Rotate off-site backup media
- All devices cleaned and optimized
- Virus/Spyware/Adware/Malware cleaning
- Inspect security and safety of devices
- Hacker-Test wireless networks
- Software installation

We offer six, twelve, and twenty-four month service contracts, and you are free to cancel within the first thirty days with no obligation to continue.

We bill at the end of the month, so there is no up-front cost to you. Call today and give PRS Tek Services an opportunity to earn your business.

To Market, To Market...

These days, it does not take a superstar designer or a high-priced agency to produce snappy marketing materials. Year after year, small and large businesses alike put their good name through the gauntlet and frown at the results.

Getting your name to the right people at the right time is what makes the difference, and our marketing experience within various industries will help you do just that. From website development to trade shows, we have the right people to make it happen.

Our marketing services include:

- Brochure design and layout
- Authoring literature
- Photography and videography
- Website hosting, development, and maintenance

Our maintenance plans start at only \$50 per month and include email hosting and administration.

Make a Name for Yourself

Do you have your own internet domain? Do you need one? We can get your domain registered or ported over to our servers with all the web space and bandwidth you need to reach your customer base.

Photo Finish – Picture Perfect

With our graphics design and photographic experience, we can create stunning video presentations at a fraction of what advertising agencies cost.

Whether you are promoting your business, or hosting a private event, our results will make you smile with delight. You do not pay until you see the final product. Check out our work by asking for a demonstration.

We save our customers time and money through our seamless line of business services.

Call today and ask how you can get 5 hours of free technical support!

Information, Please

Knowledge is power, and power is what it takes to remain competitive. Perhaps your business requires knowledge of what is happening right now. If you can wait for the newspaper, then this service is not for you.

Many companies depend on up-to-the-minute reports of current events, weather, and traffic. Rather than sit in front of your

PRS TEK BUSINESS SERVICES

television or favorite news website, depend on PRS Tek Services to dispatch the data you need – as it happens – straight to your email or mobile device. We maintain our own Information Exchange Center 24/7.

Do you want your own IEC custom built on-site? We will build it out and train your employees to run it; or you can use our people at your location. Either way, you stay on top of your game when you're in-the-know!

Trust Some, Verify All

Do you know where your field employees are? Did someone take a company vehicle for a spin... in Vegas? We can show you the latest in GPS tracking technology, so you can be sure you are getting the most out of your assets.

Backup a Minute

Got data? With computers, the question is not if, but when your system will fail. Disaster planning is our specialty.

In fact, we think it is so important, that we will offer a free disaster plan, custom written for your business, and show you how to manage it. All you have to do is call for an on-site consultation.

Technology Unplugged

Do you have that new PDA phone? Isn't it cool how you can plug it in to your desktop or laptop and have it synchronize with your favorite email and contact manager?

The truth is, if you are plugging in to data-sync your PDA, you are behind the times. Let us show you how you can make your PDA phone synchronize automatically, wirelessly, and never have to plug in again.

Sneaker-Net? No More

Are you wearing out your shoes by running around the office more than you should? Would you like to get your computers networked so you can share files and printers?

You do not have to have a server to make that happen. Stop running around and let us put your business all on the same page.

Be Served, Be Delighted

A server is not as expensive or complex as you might think. Even if you have only two or three computers, the benefits of a server will excite you. We can fit any environment with a server solution that is right for you.

Portable is Possible

We have what it takes to establish your office network from anywhere in the country. You can be in your vehicle on a job site – in another state – and operating your computer as though you were sitting right in your office.

Our expertise in wireless VPN and Remote Access technology will improve your productivity wherever you may be.

Questionable Integrity

For any business, a customer database is its lifeline. Perhaps you have some new contact management software you would like to use, or have lost or corrupt data from migration attempts.

Allow our team to handle your contact management and never risk data integrity again.

Have Office, Will Travel

If your business is carried out more in the field than the office, then maybe you should consider moving your office with you wherever you go. Office trailers have become more popular among business on the move... literally.

From a single 8X10 foot to the oversized cargo trailers, we can outfit your mobile office with all the IT comforts of home.

Learn Something New

Nothing slows down office productivity more than inadequate experience with basic word processing, spreadsheet, and database management. We can speed things up by giving you a hands-on, custom tailored training session. We can show you the tricks and treasures of mastering the desktop tools of the trade.

In-House Security, Out-House Relief

Keep tabs on what's happening with our covertly installed surveillance technology. Whether you are "in" or "out" – you can view your business area in real time while it records to a secure server.
